

User Documentation

Welcome to the **Smart Route Planning**. This guide walks you through how to use the application to upload data, view appointments, and generate optimized service routes.

Home Page

The Home Page is your entry point to the system.

Upload Data

You can upload two types of CSV files:

- Appointment Data – Includes job information (e.g., location, time window).
- Company Info Data – Contains company locations and configuration details.

 AMOS - Smart Route PlanningHome Calendar

Upload Appointment Data

Drag & drop a CSV file here, or click to select

Upload Company Info

Drag & drop a CSV file here, or click to select

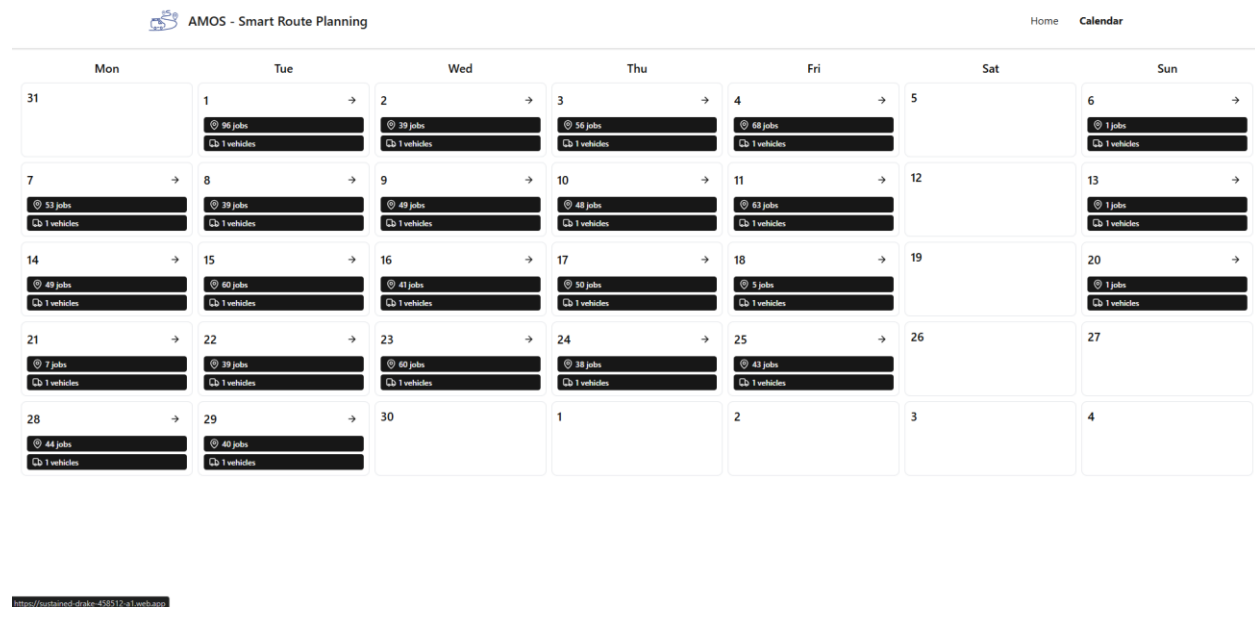

N.B. Once uploaded, the system will store data.

Calendar Page

After uploading your data, you'll be taken to the Calendar Page.

View Jobs and Vehicles

- Each calendar date displays the number of appointments and available vehicles.
- This gives a quick overview of workload distribution.
- Click on any date to open the Map View Page for that day's appointments.

Map View Page

This is the core page for route planning and optimization.

Select Appointments

- A list of appointments appears in the sidebar.
- You can select or deselect specific jobs to include in optimization.
- Change Start/Finish Address – Set custom start and end points for the route.
- Set Number of Workers – Specify how many workers/vehicles will be used.

Start Optimization

- Click "Start Optimization" to begin route generation.
- The system will calculate the optimal paths for the selected jobs and workers.

The screenshot displays the AMOS - Smart Route Planning web application. The interface is divided into several sections:

- Top Bar:** Includes the logo "AMOS - Smart Route Planning", navigation links "Home" and "Calendar", and a date selector "Map for Dienstag, 29.04.2025".
- Left Sidebar:** Contains a tab for "Appointments" and a "Select All" checkbox. Below is a list of appointments with their times and addresses, each accompanied by a checkbox.

Time	Address	Status
09:00 AM - 11:00 AM	Johannisthaler Ch 46, 12437 Berlin	☒
09:00 AM - 11:00 AM	Dettrickstraße 37, 14199 Berlin	☒
09:00 AM - 11:00 AM	Messedamm 26, 14055 Berlin	☒
09:00 AM - 11:00 AM	Spandauer Damm 157, 14050 Berlin	☒
10:00 AM - 01:30 PM	Rollbergstraße 70, 12049 Berlin	☒
10:00 AM - 12:30 PM	Spichernstraße 24, 10777 Berlin	☒
11:00 AM - 12:30 PM	Straße des 17. Juni 135, 10623 Berlin	☒
12:00 PM - 02:30 PM	Hauptstraße 9, 13138 Berlin	☒
01:00 PM - 03:00 PM	Alte Schönhauser Str. 46, 10119 Berlin	☒
01:00 PM - 02:30 PM	Richard-Sorge-Straße 21, 10249 Berlin	☒
02:00 PM - 02:30 PM	Altenstraße 11, 12049 Berlin	☒
- Main Content Area:** Titled "Route & Worker Information", it features a map of Berlin with red pins indicating appointment locations. Above the map are input fields for "Start Address" (Am Pankepark 12, 10115 Berlin) and "Finish Address" (Am Pankepark 12, 10115 Berlin), a "Number of Workers" slider set to 6, and an "Optimization Plan" dropdown set to "Time Optimization". A "Start Optimization" button is located at the bottom right of this section.

Viewing Results

Once optimization is complete, the routes are displayed on the map.

Tab View: Appointments vs Routes

Use the tab switcher in the sidebar:

- Appointments Tab – View all appointments and selection status.
- Routes Tab – View optimized routes with additional controls.

In the Routes Tab:

Timeline View

- Each route is shown in a timeline view, representing job order and timing.
- You can toggle visibility of any route to show/hide it on the map.

Download Options

- Download individual route data one by one.
- Download all route data at once in a batch.
